INTRODUCTION

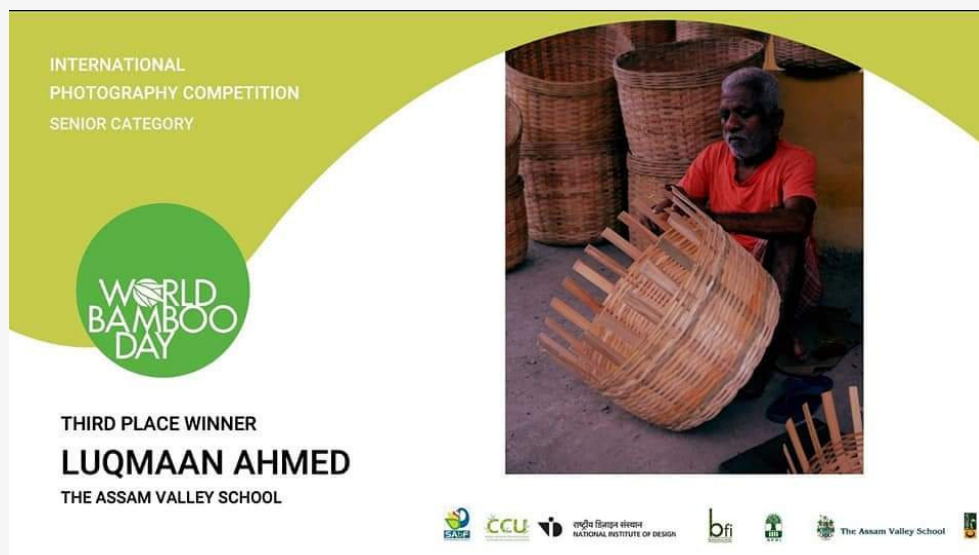

By-Dhrupad Choudhary | Class 12

Photography is an art which enables a person to see the world in a different way and add colour to the things he or she sees which otherwise a normal person doesn't observe. It gives life to the pictures you click and makes the viewer realise how beautiful the world is and how much there is to see in everything present in this vast world. A photographer doesn't always have to be in the most beautiful places to get the best pictures; sometimes its own creativeness and whatever you see in your day to day life gives out the most unique pictures you can think of. What matters is how creative and imaginative you are.
